

Curriculum vitae

Katrín Björnsdóttir Gothenburg, Sweden katbjo@gmail.com

Employment

2020–2026	University of Gothenburg – PhD, Biology. Focus: plant ecology (includes 1.5 years of parental leave)
2019–2020	Parental leave
2018–2019	United Nations University Land Restoration Training Programme – Project manager (about the programme)
2015–2018	University of Iceland – Field assistant in Iceland and Svalbard. Project responsible: Prof. Ingibjörg Svala Jónsdóttir and Isabel C. Barrio – Lab assistant. Project responsible: Prof. Ingibjörg Svala Jónsdóttir – Lab assistant. Project responsible: Bryndís Marteinsdóttir

Teaching

2020–2025	University of Gothenburg – Biodiversitet och Ekologi (BIO916 / LGBI12 / L9BI12) – Växtekologi ur klimatperspektiv (BIO503) – Naturvård, förvaltning och skötsel (BIO499) – Naturvetenskapligt basår, ekologi (NBAB00) – Ekologi och evolution för miljövetare
2020–2024	Supervision of two master's students
2018	United Nations University Land Restoration Training Programme – Lecturer, module on <i>Introduction to the use of references & exercise</i>

2018	University Centre in Svalbard (UNIS) – Flux of Matter and Energy from Sea to Land (AB-322)
------	---

2017–2018	University of Iceland – Ecology for undergraduates (LÍF311G) – Field course for undergraduates (LÍF536G) – Ecology for graduates (LÍF505M)
-----------	---

Education

2016–2018	University of Iceland – M.Sc. Biology
-----------	--

2012–2015	University of Iceland – B.Sc. Biology
-----------	--

Additional training

2018	TraitTrain, International Plant Functional Traits Course – 4 ECTS field course, 16–27 July 2018, Svalbard (course site)
------	--

Conference presentations

Talks

2026	Björnsdóttir K, Myers-Smith I, Thomas H, ..., Bjorkman A. Tundra plant shifts driven by bryophyte loss enhance decomposition potential. NSO–GfÖ Conference 2026, Odense, Denmark (September).
------	--

2026	Björnsdóttir K, Myers-Smith I, Thomas H, ..., Bjorkman A. Tundra plant shifts driven by bryophyte loss enhance decomposition potential. Icelandic Ecological Society Conference (April).
------	---

2024	Björnsdóttir K, Thomas HJD, Pacheco-Riaño LC, Myers-Smith IH, Bjorkman A. Tundra vegetation change does not alter community litter decomposability. 21st ITEX meeting, Vancouver, Canada (April).
------	--

2021	Björnsdóttir K, Barrio I, Jónsdóttir I. Decomposition responses to climate warming and sheep grazing in the high and sub-Arctic. Icelandic Ecological Society Conference (October).
------	--

2018	Björnsdóttir K, Barrio I, Jónsdóttir I. Decomposition responses to climate warming in the high and sub-Arctic. Nordic Oikos Conference, Trondheim, Norway (February).
------	--

2017 Björnsdóttir K, Barrio I, Jónsdóttir I. **Decomposition responses to climate warming and sheep grazing in the high and sub-Arctic.** Icelandic Biology Conference, Reykjavík, Iceland (October).

Posters

2025 Björnsdóttir K, Myers-Smith I, Thomas H, ..., Bjorkman A. **Climate warming-induced vegetation changes in the tundra have not yet altered community litter decomposability.** Swedish Oikos Meeting 2025, Stockholm, Sweden (February).

2024 Björnsdóttir K, Thomas HJD, Pacheco-Riaño LC, Myers-Smith IH, Bjorkman A. **Can we use plant functional traits to predict decomposition across the Arctic?** NSO Conference 2024, Lund, Sweden (March).

2018 Björnsdóttir K, Barrio I, Jónsdóttir I. **Decomposition responses to climate warming in the high and sub-Arctic.** 19th ITEX meeting, Stirling, Scotland (April). Best poster award.

2017 Björnsdóttir K, Barrio I, Jónsdóttir I. **Decomposition responses to climate warming and sheep grazing in the high and sub-Arctic.** Icelandic Ecological Conference, Hólar, Iceland (March). Best poster award.

Referees

Anne Bjorkman

Senior lecturer, University of Gothenburg
anne.bjorkman@bioenv.gu.se

Isabel C. Barrio

Professor, Agricultural University of Iceland
isabel@lbhi.is
